## Fullstack Developer

### PROFESSIONAL SUMMARY

Fullstack Developer graduated from EBAC and currently pursuing a degree in **Systems Analysis and Development** at **Centro Universitário Cesusc**. I have a proactive, organized, and results-oriented profile, focused on building modern web applications using best practices and up-to-date technologies.

I am currently part of the **IT team at Centro Universitário Cesusc**, contributing to the development and maintenance of internal systems, technical support, and optimization of internal workflows. This experience has strengthened my technical foundation and teamwork skills, while significantly expanding my knowledge in IT infrastructure, including **hardware, servers, networks, and corporate IT environments**.

At the moment, I am developing an **internal intranet system**, hosted on a private server, with a strong focus on **security, access control, and documentation**. This is the main project I am currently working on.

I also study **English at DevSpeak**, continuously improving my communication skills and technical reading.

My main technologies today are **React with TypeScript** on the front-end and **NestJS with TypeScript** on the back-end.

### EDUCATION

- **Systems Analysis and Development** – Centro Universitário Cesusc *Aug 2024 – Aug 2026*
- **English for Programmers** – DevSpeak - *Jul 2025 – Present*
- **Front-End Developer (Professional Course)** – EBAC - *Aug 2024 – Feb 2025*
- **Technical High School** – SESI SENAI - *Jan 2021 – Jan 2024*

### PROFESSIONAL EXPERIENCE

Unicesusc - Florianópolis - Santa Catarina 07/2025 - atualmente

*Large-sized Institution*

**Fullstack Developer / IT Support**

● Member of the Information Technology team, assisting in system and infrastructure maintenance, user support, and participation in internal improvement initiatives and projects that contribute to institutional innovation and efficiency..

● Hands-on experience with technologies related to the academic environment and internal operational workflow organization.

Mega Elétron - Florianópolis - Santa Catarina 06/2024 - 09/2024

*Small-sized Company*

**Graphic Designer**

- My experience in Graphic Design has been essential to my work as a Front-End Developer. Creating visual identities and graphic materials taught me how to apply concepts such as **visual hierarchy, typography, and color palettes** to build attractive interfaces aligned with brand identity.

## LANGUAGES

- **English:** Advanced | **Spanish:** Basic | **Portuguese:** Fluency

## RELEVANT PROJECTS

Intranet Unicesusc - Em desenvolvimento 12/2025

- Internal system for the IT department, currently under development, focused on increasing security and organizing access control. Hosted on a private server, the system allows login through manager-created accounts, external access control, and centralized documentation. There are future plans to expand it to include server management, cloud environments, and other advanced features.
- **Frontend Technologies:** React, TypeScript, Axios, Tailwind CSS, React-Toastify e Zod.
- **Backend Technologies:** NestJS, Express, JWT, PostgreSQL

My Portfolio 03/2025

- Portfolio developed to showcase my projects, skills, and contact information. It features a modern and responsive interface, highlighting my front-end experience with React and TypeScript. Includes data integration, state management, and UI/UX best practices.
- **Libraries:** React, TypeScript, styled-components, React Router, Vite
- Github: Link
- Site: Link

The Blog 07/2025

*Modern Development*

- Full blog application with user registration and post creation, featuring secure authentication using JWT and cookies to protect routes. The back-end is built with NestJS and SQLite, while the front-end uses Next.js, TypeScript, and Tailwind CSS. The project follows Git and GitHub best practices and was designed to deliver a smooth and secure experience for both users and administrators.
- **Technologies:** Next.js, TypeScript, Tailwind CSS, NestJS, SQLite, Git, GitHub
- Frontend: Link
- Backend: Link
- Demonstração: Link

Chronos 05/2025

*Modern Development*

- Time management application based on the Pomodoro technique, featuring customizable timers and work/rest cycles. Built with React, TypeScript, and CSS Modules, structured with React Router, useReducer, and Context API. Implements Web Workers to keep the timer running even when switching tabs, React Toastify for notifications, and LocalStorage for data persistence.
- **Technologies:** React, TypeScript, CSS Modules, React Router, useReducer, useContext, Web Workers, React
- Github: Link
- Site: Link

Efood 12/2024

*EBAC*

- E-commerce-style web application inspired by iFood. Users can browse multiple stores, add items to the cart, enter their location, and complete payments in a practical and intuitive way.
- **Technologies:** React, TypeScript, styled-components, Redux, React Router, API consumption
- Github: Link

SESI Canteen 12/2023

*SESI SENAI*

- In a team of five members, we developed an application to improve the efficiency of the school canteen, which faced issues with long lines and disorganization. I was responsible for front-end development, ensuring an intuitive and functional user interface.
- **Technologies:** React Native, TypeScript, CSS, React Router, Java (Back-end)
- Github: Link

## TECHNICAL SKILLS

- **Front-End:** React, TypeScript, JavaScript, Tailwind CSS, Zustand, Zod, React Hook Form, Axios, Sass, HTML
- **Back-End:** Node.js, NestJS, Express, JWT, CI/CD, Docker (basic)
- **Databases:** Firebase, MongoDB, SQL Server, PostgreSQL
- **Best Practices:** Clean Code, Componentization, Mobile First, Responsiveness, Accessibility, Git, Testing with Jest, Deployment with Vercel
- **Design & Productivity:** Figma, Trello, Google Workspace, Adobe Creative Cloud
- **Additional Knowledge:** UI/UX Design, Basic SEO, State Management (Context API, Redux), Agile Methodologies (Scrum, Kanban), Cybersecurity (basic), Software Architecture
- **Soft Skills:** Proactivity, Clear communication, Organization, Teamwork, Problem-solving, Fast learner, Adaptability, Continuous improvement mindset

## COURSES & ADDITIONAL ACTIVITIES

- Modern Development – Short Course – Luiz Otávio Miranda – 2025
- React from Zero to Mastery – Udemy – 2025
- Advanced JavaScript & TypeScript – Udemy – 2024
- Modern JavaScript – Curso em Vídeo – 2023
- Cybersecurity – Cisco – 2022
